HEALTHDOC AI

Synthetic Test Document • Healthcare Information & Benefits

Purpose: This fictional sample is designed to test document upload, text extraction, summarization, semantic search, question answering, and citation behavior in HealthDoc AI. It is not a real insurance policy or medical document.

1. Fictional Plan Overview

The ExampleCare Silver Plan is a fictional health benefits plan created only for software testing. The plan year runs from January 1 through December 31, 2026. All amounts, limits, and rules below are invented test data and should not be treated as actual coverage terms.

Item	Fictional test value
Annual deductible	INR 10,000 per covered member
Annual out-of-pocket limit	INR 50,000 per covered member
Primary care visit	INR 300 copayment per visit after deductible
Specialist visit	INR 600 copayment per visit after deductible
Emergency department	INR 2,000 copayment; waived if admitted
Preventive check-up	Covered at 100% in-network, with no deductible
Prescription medicines	Generic: INR 100; preferred brand: INR 400; non-preferred brand: 30% coinsurance

2. Eligibility and Enrollment

For this fictional example, employees working at least 30 hours per week may enroll. Enrollment must be completed within 30 days of the employee's start date. A qualifying life event, such as marriage or the birth of a child, permits a change request within 30 days of that event. These rules are synthetic and do not describe any real employer or insurer.

3. Example Coverage Rules

In-network services use the cost-sharing values shown in the plan overview. Out-of-network services are not covered in this fictional plan, except for emergency stabilization. Emergency stabilization is covered at the in-network cost-sharing level. Prior authorization is required for planned MRI scans and selected outpatient procedures. A prior authorization request is not a guarantee of payment.

4. Example Claim Review Workflow

1. A claim is received and checked for required fields.
2. The system checks member eligibility and the service date.
3. The claim is checked against the fictional plan's coverage rules.
4. Claims with missing information are placed in a manual-review queue.
5. A reviewer confirms the available documentation before any final decision.

5. Glossary

Deductible: The amount a covered member pays for eligible services before the plan begins sharing certain costs.

Copayment: A fixed amount paid for a covered service.

Coinsurance: A percentage of the allowed cost paid by the member.

Prior authorization: A review performed before certain services to determine whether plan requirements are met.

In-network provider: A provider contracted under a plan's network rules.

6. Test Questions for HealthDoc AI

1. What is the annual deductible in the ExampleCare Silver Plan?
2. How much is the fictional specialist visit copayment, and when does it apply?

3. What is covered at 100% without a deductible?
4. Which services require prior authorization?
5. Does prior authorization guarantee payment?
6. What is the annual out-of-pocket limit?
7. What is the deadline to enroll after starting employment in this fictional example?
8. Summarize the claim review workflow in five steps.
9. Explain the difference between a copayment and coinsurance using this document.
10. If the document does not specify a benefit, how should HealthDoc AI respond?

7. Expected Extraction Anchors

Use this section to check whether the app can find key values accurately: INR 10,000 deductible; INR 50,000 out-of-pocket limit; INR 300 primary care copayment; INR 600 specialist copayment; INR 2,000 emergency department copayment; 30-day enrollment window; prior authorization for planned MRI scans and selected outpatient procedures.
